- Dell Blades Engineers**

Services

- ❑ **Software Development** Businesses are facing challenges around architecture, technology selection, usability of the User Interface, scalability, development methodology and functional complexity which as a result are making a case for less off-shelf solution uptake to more custom application development. We have provided solutions to companies across the different industry verticals with a strong focus on quality and meeting of customer expectation. This is done using the Agile methodology platforms of Java, .NET, PHP and Android coupled with our in-house expertise to support the different DBMS
- ❑ **IT Infrastructure Consulting** As businesses seek to gain scalability and flexibility to optimize their infrastructure, we provide innovative ways to provide long-lasting value from networks to entire data centers including management of the operation environment. We offer IT consultancy on storage, networks, hardware, power and software (vertical) solutions from expertise garnered over years in enterprise environments.
- ❑ **Managed Services** Companies are freeing up their resources to focus on the critical aspects of their business with internal IT teams becoming smaller and smaller creating the need for outsourced companies to complement existing in-house staff. Our services are offered in a cost-effective manner and we are dynamic enough to accommodate varying business requirements, where required we can provide a permanent on-site engineer.
- ❑ **Financial Inclusion** Solutions to engage the underserved and unbanked population including enabling software and devices to support the engagement.
- ❑ **Turn-Key Solutions** With increased demand for end-to-end outsourced services, we have a team of industry experts with ability to deliver turn-key projects.
